Forend Rail: Picatinny Rail

PRODUCT DESCRIPTION

The TP9SA Mod 2 contains several upgrades driven by the feedback of military and law enforcement including a flat-top slide allowing for better sight acquisition and a top-mounted disassembly button. The grip has aggressive stippling patterns to fully engage the user's hand under any adverse conditions. Like the rest of the TP-series family, the TP9SA's grip design allows a slimmer feel while still containing an 18+1 capacity in 9mm.
